Highlights

- Seventeen of 26 areas grew in April for a combined increase of 22,300 jobs. Eleven areas grew over the year, while seven areas contracted.
- The Houston-The Woodlands-Sugar Land MSA accounted for more than half of all area employment gains over the month. The MSA increased its annual growth rate to 1.6 percent.
- The San Angelo MSA grew fastest in percentage terms with a 0.8 percent April expansion. Per not seasonally adjusted Industry data, Retail Trade and Other Services each added 200 jobs over the month, while Government was down 200 positions.
- The Dallas-Plano-Irving MD led in actual and percentage job growth annually. Professional and Business Services led all major industries with 21,000 positions gained, followed by Leisure and Hospitality with 10,900 jobs added.
- The Beaumont-PA and the Texarkana MSAs lost the most jobs annually. The loss of 2,300 jobs in Retail was primarily responsible for the contractions in the Beaumont-PA MSA, while employment losses in Texarkana were spread across industries.

What Will Happen to Experienced Oil, Gas Workers?
by Valerie Jones Rigzone Staff Wednesday, August 16, 2017

Nearly one-third of respondents to Rigzone’s worker exodus survey are highly experienced (having more than 20 years of oil and gas experience). This group of industry professionals has been quite vocal about how they feel about leaving the industry – either voluntarily or involuntarily.

Some have decided to leave the industry due to disappointing job opportunities or an uncertain future with volatile commodity prices. Several have gone as far as to swear off the industry altogether and warn newcomers against entering into the world of oil and gas.

“As long as we have workers willing to learn and put their skills to use, they will be needed. There is no room for complacency; workers need to adjust to change.”

Fifty-two percent of Rigzone’s respondents with more than 20 years of industry
experience are currently unemployed, having most recently worked in oil and gas. Almost if of these people were the victim of a layoff within their company. Yet 83 percent of them are still actively looking for employment in the oil and gas industry.

**Glory Days Are Gone**

Many experienced job-seekers have reached out to Rigzone, expressing frustration with employers, claiming they were pushed out to make room for younger and cheaper labor. However, Regina Mayor, U.S. and global energy sector leader for KPMG, doesn’t see this as the case.

“My perspective is that less experienced resources have been cut to save more experienced sources,” Mayor told Rigzone. “Oil companies have favored experience and performance during the downturn … they have tried to use this down cycle to create a high-performing culture and use previous performance and experience as the key indicator for retaining resources.”

David Hsieh, an oil and gas professional with 35 years of industry experience, was laid off (he was asked to sign a termination agreement) during the most recent downturn and he says this low cycle is much different than past ones.

“I chose to retire after working as an expert in China for 18 years and there was no hope of firm recovery,” he told Rigzone. “I am one of the lucky ones that enjoyed the glory days big oil and my own frugal lifestyle to have plenty to retire at age 58. I did not actively seek for employment and didn’t focus in my old field, but feel the combination of my 35 years’ experience and seniority give the recruiters excuses to bypass me.”

Having survived the energy crises of the 80s and the financial crisis of 2009, Hsieh maintains this down cycle is more than a “severe winter.”

The upstream oil and gas industry recovered within a year each time even though many
us in operations were removed from the payroll,” he said. “The world had never
perceived such a drastic collapse of an industry and this is more like an ‘Ice Age’ of the
troleum industry in my opinion. The glory days are gone!”

**Life After Oil and Gas**

Some workers found greener pastures in other industries after being laid off from oil and
gas. Twenty-year oil and gas veteran Reinel Solano is one such person, who used his
severance money to purchase his own Floor Coverings International franchise in
Houston. Solano, who was a reservoir engineer, has since hired two full-time employees
ded to five crews of contractors. Though he said managing a business doesn’t come
thout its stress, he enjoys the work. Still, returning to oil and gas is a possibility.
He would like to have his company more established and with a staff that can sustain itself;
I would consider going back into the oil business,” Solano said.

Sergio Garcia said his oil and gas background helped him in his current role as an
environmental health and safety manager for General Dynamics, an aerospace and defense
company.

After being laid off from Freeport McMoRan Oil and Gas in April 2016, Garcia was able
leverage his skillset and graduate degree in environmental management to a land a
position with General Dynamics.

“On the oil patch, we deal with all kinds of regulators and regulations, so we are better
pared to face the challenges when we cross over to other industries, in my case, going
om oil exploration to manufacturing of satellite components,” he told Rigzone.

Garcia’s not looking to return to oil and gas – ever.

“Being in the position of waking up to find out that you will not get a bonus or raise
cause the price of a barrel of oil has tanked is bullshit and does not make for stability for
employee, company or countries,” he said. “Until they come up with a different
arket paradigm to address this, there will always be volatility.”

Something that isn’t going anywhere in oil and gas is the shift toward automation, and
ore experienced workers who want to continue in the industry would do well to continue
adapt more skills in this arena.

As long as we have workers willing to learn and put their skills to use, they will be
ed,” said Garcia. “There is no room for complacency; workers need to adjust to
ange.”

Mayor shared a similar sentiment.

“Key for more experienced resources is to ramp up their skills in technology –
monstrate tech skills and tech-savvy,” she said. “The oil and gas industry will require
earer technological skills, but will still need deep expertise in its processes and
ipment. More experienced resources will be well-equipped to compete if they couple
ir industry depth of expertise with technology know-how to continue to succeed in the
ew normal.”

**Methodology**

Rigzone conducted the worker exodus survey using online survey tool
SurveyMonkey. The survey was executed via email to Rigzone’s member database as well
the company’s social media platforms from May 11 through May 18 and garnered
ore than 1,500 responses from nearly 100 countries.
Texas Ends 2016 with 210,200 Jobs Added Over the Year
State unemployment rate remains at 4.6 percent in December

AUSTIN — Texas has added an estimated 210,200 seasonally adjusted jobs since December 2015 with the addition of 800 nonfarm jobs this December. The state has added jobs in 20 of the past 21 months. Texas' seasonally adjusted unemployment rate maintained a 4.6 percent rate in December.
