

**Workforce Solutions South Plains  
Truck Driving Simulators RFP  
Questions and Answers  
10/21/2019**

**Question 1:**

Is this RFP for four (4) separate simulators that may be located in different locations/rooms? I.E. independent systems each having their own instructor's position? Or is the requirement for a four (4) place system. I.E. that the four simulators share the same instructor position and are all networked together in one training room.

**Answer:** Our plan is to have all the simulators in the same class room, but we want each simulator to be independent. That way one student can say be working on backing up while another student is driving in icy mountainous conditions, and each simulator has its own computer with diagnostics for the instructors.
